TI-PROBOARD® FOR TILING DECKS

The Exterior Deck Solution

TI-PROBOARD is the only single component deck system available for tiling decks. It's a durable and virtually maintenance free composite panel that is unaffected by expansion, contraction or exterior weather conditions.

The Strength Behind the Beauty
Installation Instructions

1) Placement of TI-ProBoard
Install TI-ProBoard directly to the joists and run boards perpendicular to them. Screw the first TI-ProBoard (with the slot) in from the edge of the deck frame. It is very important to make sure the first board is straight and square. Measure and use a chalk line. Continue by interlocking each board to the next, and screw TI-ProBoard down on each joist. Put screws every 4 ribs. Recommended joist spacing is 16" on center.

2) Joining/Butting TI-ProBoard
Place each end equal distance on the center of joist. DO NOT MAINTAIN A CONTINUOUS SEAM ALONG THE SAME JOIST- ALL SEAMS ARE TO BE STAGGERED. No one piece of TI-ProBoard can be shorter than 3 joist spans. A wet saw is recommended when cutting TI-ProBoard.

3) Installing Mortar Mix/Thin-set for Tile
Use a mortar mix meeting ANSI A108.1B and mix to manufacturer specifications. Trowel mortar level with the tops of the ribs ensuring the ribs fill completely. For setting tile, use a modified thin-set meeting ANSI A118.4 or better.

4) Protective/Decorative Edging
TI-EDGING™ provides a protective and decorative finish. Install while the thin-set mix is still wet. This can be done after the TI-ProBoard has been screwed down and mortar bed applied. Press TI-EDGING into the thin set with the long side pressing against the deck board.

FinPan Inc. 3255 Symmes Rd., Hamilton, Oh 45015 800.833.6444 sales@finpan.com

---

All items needed to tile decks
- TI-ProBoard
- TI-ProBoard Screws
- Mortar Mix
- WaterArmor Liquid Waterproofing for decks
- Protecto Wrap Waterproofing Membrane for underdeck living spaces
- TI-ProBoard Edging
- Outdoor grout
- Tile

TI ProBoard is a structural material so there is no other plywood, backer boards etc. required.
