

## PRODUCT SPOTLIGHT / FEBRUARY 2020

### TI-ProBoard® Structural Composite Deck Panels

Two of the hottest trends in the residential market continues to be outdoor living spaces and open-concept curbless showers. FinPan offers a unique underlayment product that fits both applications perfectly. TI-ProBoard is one of the most versatile products offered by FinPan. TI-ProBoard is a structural composite board manufactured from pultruded fiberglass that installs directly to joists. TI-ProBoard is the only single component system on the market today for exterior tile installations.

Whether it's a residential or commercial project, designing a deck or balcony has many challenges in specifying the correct materials to ensure a durable, safe and long-lasting installation. Rain, snow, salt-water and freeze-thaw are just a few of the environmental issues that must be addressed. TI-ProBoard addresses all of these issues and more. It's unaffected by expansion/ contraction, freeze/thaw or other weather conditions. Each panel is 1'x8' and is only 3/8" thick.

In response to the growing trend in curbless showers, the team at FinPan developed the ClearPath Curbless Shower Pan System around TI-ProBoard. The ClearPath Structural Drain Plate with integrated drain assembly was developed to tie the system together in a shower application. With its unique ability to be installed directly on top of floor joists, FinPan brought to market one of the first systems that didn't require modifications to existing floor joists to achieve level entry design.

TI-ProBoard has been third party tested and achieved an Extra-Heavy Floor rating in the Robinson Floor Test, ASTM C627. TI-ProBoard also achieved a Commercial Floor rating in the 14' Suspended Robinson Floor Test. It's now recognized in the TCNA Handbook under Structural Ribbed Self-supporting Boards (SRSB).

It's the only board of its kind available on the market and is backed with a 10-year Limited Warranty.

### 4' x 4' Deck Insert Kit Protect the Area Around Your Grill or Firepit!

Are you like many of us and have your grill or firepit on your wood deck?

Consider TI-ProBoard in a small section of your deck where this sits.

Tiling this area make spills an easy clean-up and reduces the chance of a potential fire.

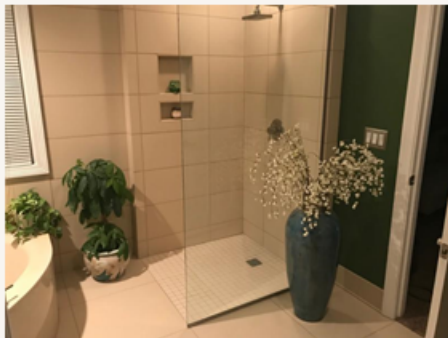

### Blur the Lines Between the Indoors and Out

If you're looking to specify a sustainable, durable and low maintenance exterior tile deck solution look no further than TI-ProBoard. With its 3/8" low-profile design, TI-ProBoard allows you to seamlessly carry your interior tile to the deck on residential or commercial projects.

TI-ProBoard is not used in conjunction with any other wood material, such as plywood or deck boards, as an underlayment. Simply install directly to the deck joists, up to 24" o.c., ensuring panels run perpendicular to joists and that proper slope is achieved to shed water.

Once installed, simply screed an exterior rated mortar to the top of the dove-tailed ribs. If there's living area underneath, FinPan specifies Protecto Wrap® Protecto Deck waterproofing membrane to be applied next. If not, you are ready-to-tile using latex modified thin set meeting ANSI 118.4 or above.

**"Embrace the Outdoors"**

### ClearPath® Curbless Shower

One of the most popular shower designs on the market today is curbless entry. A study from the American Institute of Architects, AIA, shows that doorless, no threshold showers lead the trend for bathrooms. The trend was found to be less focused on universal design and aging and more directed on the minimalist look of curbless designs.

ClearPath offers one of the most innovative ways to achieve a barrier-free entry without modifications to the floor joists. The foundation of the system is TI-ProBoard. Its unique design offers the ability to install ClearPath directly on top of the floor joists. No more costly and structural modifications to floor joists.

Once installed, simply float a mudbed on top of TI to the surrounding floor area. Let cure and come back over with the WaterArmor® Sheet Waterproofing Membrane to lock water out.

**Curb...less Appeal**

## "THE STRENGTH BEHIND THE BEAUTY"

### Specifying Made Easy

FinPan shower pan specifications can be found on ARCAT for architects and specifiers? ARCAT is the leading online resource of free building product information. CSI 3-part and Canadian CSC architectural specs can be downloaded and customized for residential and commercial projects.

**It's never been easier to specify  
FinPan shower pans.**
