

## TRENDS IN THE MARKET PLACE / JANUARY 2020

### Bathroom Trends for 2020

If you're redesigning a bathroom for yourself or your client, here's a peak at just a few of the 2020 bathroom trends to give you that up-to-date and stylish look. Best of all, FinPan has the product line and custom ability to help you bring it to life.

Modern bathrooms are transforming into personalized day spas with technologies that make the experience more relaxing and convenient than ever before. Open concept showers and curbless designs are still very much in trend moving into 2020. The open design offers more space and provides easy accessibility in and out of the shower. Open showers also visually increase the size of the bathroom. It can make a small bathroom appear to be much larger.

When it comes to the shower, more is better especially those that are multi-functional and fully equipped with such amenities such as:

- integrated bench
- linear drain
- ambient lighting
- audio equipment
- misting systems
- anti-fog mirrors

The product offering at FinPan falls right in line with the latest trends for 2020. From curbless shower designs to fully custom prefabricated shower pans that can incorporate linear drains and even ambient lighting into the design. We also offer a full line of standard shower seats, benches and custom fabrication for that one of a kind look.

No other company in our industry can offer you the ability to turn a clients dream shower into reality in around two weeks. Be sure to turn to FinPan for you, or your clients, new or remodeling projects in 2020.

#### Custom Shower Pans Bring Your Unique Design to Life!

Bring your unique design to life with a custom shower pan from FinPan.

This one-of-a-kind shower incorporated a linear drain and LED lights for a personal style unique to the client.

Contact FinPan on your next bathroom remodel and bring your design to life!

#### ProPan® Shower Base

The ProPan Contractor Grade Shower Base is a fully modifiable prefabricated shower pan that adheres to industry standards with 1/4" per foot slope to integrated drain assembly. Every ProPan comes standard with EBBE® brand square drain body and grate.

ProPan is lightweight, waterproof and it's ready-to-tilt. It's constructed of high-density polystyrene and reinforced with fiberglass mesh and waterproof coating.

ProPan can easily be cut down in size with a circular saw or even extended with the "NEW" ProPan 2' x 4' extensions.

ProPan is available by itself or in two kit forms. Please visit our website to learn more.

Ready For Any Job, Any Situation

#### ClearPath® Curbless Shower

One of the most popular shower designs on the market today is curbless entry. A study from the American Institute of Architects, AIA, shows that doorless, no threshold showers lead the trend for bathrooms.

The trend was found to be less focused on universal design and aging and more directed on the minimalist look of curbless designs.

ClearPath offers one of the most innovative ways to achieve a barrier-free entry without modifications to the floor joists. The foundation of the system is TI-ProBoard®. TI-ProBoard is a composite structural underlayment that offers the ability to install ClearPath directly on top of the floor joists. No more costly and structural concerns in modifying floor joists in order to achieve level entry designs.

Be A 2020 Trend Setter

#### Specifying Made Easy

FinPan shower pan specifications can be found on ARCAT for architects and specifiers? ARCAT is the leading online resource of free building product information. CSI 3-part and Canadian CSC architectural specs can be downloaded and customized for residential and commercial projects.

**It's never been easier to specify FinPan shower pans.**

Be sure to visit [www.aecdaily.com](http://www.aecdaily.com) and take two of our free online educational courses to earn continuing CEUs. AEC Daily provides FREE online courses that provide state credit and many other association approvals, such as AIA, for architects, specifiers and interior designers.
