

## AMERICAN OWNED - AMERICAN MADE / JUNE 2020 ISSUE

With the July 4th holiday right around the corner what better time to proudly celebrate the fact that FinPan is American owned and that all of our products are manufactured right here in the United States.

FinPan is positioned to bring you and your customers products quickly with our valued employees and strategic location to major transportation routes. From standard to custom designs, our innovative manufacturing capabilities offer you choices other manufacturer's in our industry just can't offer.

So with that, we wish you, your family and family of employees a happy and safe July 4th holiday. Give us the opportunity and honor of serving you from an American-owned and American-made company.

### A History of Innovation

Since 1974 when FinPan invented the continuous manufacturing process for concrete backerboard to the original one-piece PreFormed® Niche, we've had a long history of product innovations that have helped change the way tile installations are performed.

From backerboards, shower pans, niches, seals and waterproofing accessories, check out our complete line of American made products.

**ProPanel® Lightweight Waterproof Backerboard**

We've been working diligently over the past few months in building our new production line for ProPanel Lightweight Waterproof Backerboard here in our Hamilton, Ohio headquarters.

As many of you have noticed, ProPanel now comes in a gray color that more closely resembles our polymer Portland cement coating. Portland cement increases in strength over time and provides a chemical bond between the board and thinset used to adhere tile. This chemical bond provides superior adhesion over non-cementitious boards that use sheet membranes as their bonding surface.

ProPanel is one of the most competitively priced foam boards on the market and with our LTL Free Freight Program, you can qualify for free shipping. Call us for pricing and details on the LTL Program.

**Did We Mention It's "Made in the USA"**

**Its Grill Time....Be Safe!**

There's nothing better during the July 4th weekend than spending time with family, friends and grilling out hamburgers and hotdogs...it's the American way! In fact, Americans eat about 150 million hot dogs on July 4th.

Depending upon the structure that your grill sets on, this can sometimes turn into a fire hazard. According to the National Fire Protection Assoc. (NFPA), July is the peak month for grill fires. Many of us have our grills placed on wooden decks. Decks are not always the best location for these.

Grills can be messy, but more importantly sparks from a grill can ignite wood deck boards.

One simple and attractive way to help in preventing this is to use the TI-ProBoard® 4' x 4' Deck Kit. Simply remove existing deck boards and replace with TI-ProBoard and tile. Not only will it help to protect your deck but it will make clean-up a snap.

**"Be Safe and Styling at the Same Time with TI-ProBoard"**

## "SIMPLE TILEABLE SOLUTIONS...BOTH STANDARD & CUSTOM DESIGNS"

### Product Knowledge (PK) Training Webinar & Videos

Visit our website or click on link below to watch our Product Knowledge (PK) video as well as some new videos that we just dropped.
