

INDUSTRY NEWS / MARCH 2020

The month of March has dramatically changed all of our lives and how we go about our daily activities, including our jobs. Many of us are currently working from home or going to the office only to see a noticeable downturn in business activity. The COVID-19 outbreak, and the resulting measures across the U.S. in an effort to stop the spread, is unprecedented in our lifetimes.

As of March 23, FinPan is remaining open amid this pandemic and staying up to date with all the recommendations from the State of Ohio, CDC and WHO. For 45 years, we've always put our employees, their families and our customers first. Their health and safety being our top priority. We are continually keeping up to date on best practices and guidance from the Centers for Disease Control and Prevention and information from our local & state health departments and government officials. Our management team is meeting daily and communicating to those on the production floor in this effort to remain safe. We have also implemented travel restrictions for all of our sales personnel and are limiting all outside visitors to our facilities. Despite the limited travel our sales team is remaining very active utilizing the digital technology available to conduct on-line meetings and product training sessions as well as to answer technical questions as needed.

At this time our office will remain open, Monday-Friday, from 8 am - 5 pm, until further notice. We are available via phone during our normal office hours and by email. We will continue to monitor the situation and will take additional measures if necessary.

We realize that business as usual has changed dramatically over the last three weeks. If you're working from home or experiencing a downturn in business, now is a great time to broaden your knowledge on the latest trends in showers all while earning CEU's as you do it. FinPan has two courses at aecdaily.com that will have you ready to specify FinPan Shower Systems for home remodel to large scale projects for hotels, condominiums and more.

Most importantly, everyone at FinPan wants to wish you and your family the best during these trying times and "BE SAFE AND BE HEALTHY". We look forward to continuing servicing all of our customer's needs and firmly believe that by working together we will all manage through these unprecedented times.

Continuing Education CEU's

Now is a great time to broaden your knowledge on the latest trends in showers all while earning CEU's. FinPan has two courses at aecdaily.com that will have you ready to specify FinPan Shower Systems for home remodel to large scale projects for hotels, condominiums and more.

Course I: Water Management Solutions for Traditional & Curbless Shower Pan Installations

An average shower receives around 92 feet of water per year. Getting your waterproofing right the first time is critical to a long-lasting installation.

The Water Management Solutions for Traditional and Curbless Shower Pan Installations course provides an overview of design criteria used in designing water management solutions for shower pans and walls. Includes discussions on traditional and new methods of waterproofing shower floors and walls. It also discusses new methods of construction and design options for curbless shower pans.

FinPan's complete line of PreFormed and ProPan Shower Pans, Niches, Seats and tile backerboards are designed to manage water in wet areas. FinPan's shower pans are UPC listed and meet IAPMO-PS-46 standards and are code approved in the United States and Canada.

From standard to custom shower pan designs, FinPan shower pans ensure years of durable and worry-free performance.

Course II: Current Trends in Design: Curbless Shower Systems

The Current Trends in Design: Curbless Shower Systems focuses on the growing popularity of barrier-free shower designs. Bathrooms can be dangerous places for people with and without physical limitations. In fact, the bathroom is the second most dangerous room in the home after the kitchen. The prevalence of bathroom falls among persons of all age groups and levels of ability has helped drive the trend in accessible shower design.

The course provides an overview of how curbless shower pans are designed for durability and safety and meet the needs of accessible design. Included are discussions on traditional and modern shower pan design and installation methods and their associated drawbacks and benefits.

The ClearPath Curbless Shower Pan from FinPan is designed to maintain independence while being both sustainable and stylish. It requires no modifications to floor joists and is built directly on top of them. Follow the link to learn more;
